

## Model D Firmware

### Version 1.0.5 - (02 March 2018)

#### Firmware Update Tools

**Note:** This is a software tool for Model D firmware upgrade. The latest device firmware is built-in.

- **Environment Requirement:** Microsoft Windows 7/8/10 with .NET 2.0 or above
- **Model Name:** Model D
- **Model Code:** P0CQJ
- **Firmware version:** 1.0.5

#### Addressed Issues

1. Boot loader updated to work with Windows 10.
2. Fixed issue when holding two notes, releasing a note re-triggers the filter envelope.
3. Fixed issue with transpose not working after receiving the correct sysEx command.
4. Fixed issue with pitch bend not functioning without a note on input.
